

POS Safe RT 500

Short facts:

- Protects cash at POS
- Easy installation
- Higher security due to 2 separate locks

POS Safe RT 500

Security safe

ratio tec's POS Safe RT 500 protects the daily cash revenues in the point of sale of any business. The RT 500 can be easily installed, under the sales counter or a bar, and can still remain out of sight. A reduced cash stock for the counter is recommended as well as a direct deposit of high denomination banknotes in the safe. A moveable

hand gear feeds all banknotes into a removable part. Without a key, it would be impossible to remove the banknotes from the safe. The POS Safe RT 500 offers a secure storage of the banknotes in a separate money case. This mechanical safe works with two locks. One is needed to open the safe. The second one permits the removal of the safe from the sales counter and, for example, exchange the safe for an empty one when changing shifts.

Technical Data

POS Safe RT 500

Type	mechanical, with 2 keys
Specifications	steel case, removable interior part made of steel
Measurements (l x w x h in mm)	190 x 102 x 226
Weight in kg	2,5

No chance for robbery!

Our cash is secured with a time interval system.

POS Safes RT 750 / RT 850 Twin

Short facts:

- Increased feeling of security amongst employees
- Anti-robbery labels at the entrance door
- Cash revenues secured with a time interval system
- Double banknote slot, ideal for two cash registers close to each other

POS Safes RT 750 & RT 850 Twin

Security Safes

The feeling of security at the point of sale, especially the one amongst all employees, is an important factor in stores with high cash revenues.

Robbery can traumatise employees and lead the proprietor to even worse consequences than the loss of cash. Furthermore, uncertainty can arise amongst staff and lead to additional indirect costs.

The Security Safes RT 750 and RT 850 Twin, which should be installed at the point of sale, stores securely the daily cash revenues of any store. Cash registers can be emptied only once, after closing time, instead of several times a day. In order to discourage robbers, a note like the included adhesive label should be placed at the entrance. Payments with high denomination banknotes will no longer be a problem because they can be put in the safe directly after their receipt. It is impossible to open the Safe spontaneously if the time interval system has been activated. The electronic opening mechanism will be intermitted.

The POS Safe RT 850 Twin has a separate opening for banknotes. Therefore, one safe can be used for two cash registers at the same time.
