

RS 1000 / RS 1200

Short facts:

- Cashing-up in just one minute
- Easy and self-explanatory operation guidance
- Saves up to 10 minutes per cashing-up
- All amounts can be directly read and printed out

RS

Money Scales

The daily manual cashing-up of a shop requires valuable labour time. The RS 1000 and RS 1200 Money Scales carry out a cashing-up in only one minute. The scales are mobile and, due to their adjustable display, the counting procedure can be done either standing up or sitting. The Money Scales are easy to use because of the self explanatory instructions. The scales indicate automatically the sort of the coin/banknote to be placed, from 1 cent to 500 Euros. There is no need to press any button during the entire

counting procedure. The subtotals are added automatically into a total sum. Asides from banknotes and coins, the RS 1200 also counts coin rolls trouble-free. This version offers the possibility to calculate the float amount and deduct it from the cash receipts. The connection to a receipt printer allows a clear print-out of the cashing-up.

Faster cashing-up with removable cups from the cash draw.

Display:

Adjustable display with backlight and self-explanatory operation guidance.

Float function:

The RS 1200 can be set up for any desired float amount. The value is automatically deducted from the cash balance, displaying only the actual revenues.

Count coin rolls:

The RS 1200 recognizes each coin roll automatically. Put different coin rolls on the scale and count them just in one step.

XL-Cup support:

The optional available cup support for RS Money Scales enables to count high volumes of banknotes. Thanks to the big contact surface it is possible to put and count easily up to 400 banknotes.

Count banknotes and coins

RS Money Scales: Software for the cashing-up

The optional available software for balances RS 1000 and RS 1200 offers extra functions, which facilitate the daily cashing-up.

- Summarize, print and save various cashing up into a general report
- Export the cashing-up to external spreadsheets
- Calibrate up to 8 different cups
- Program any desired currency
- Self-explanatory instructions

Weight in kg	0,44	0,44

RS 2000 Money Scale

A device for banknotes and coins.

One for everything. One for everyone.

Dynamic Weighing

As the weight of banknotes is subject to variation, the RS 2000 calibrates itself to the optimal weight of the respective banknotes. The amount of banknotes that can be placed at once increases automatically, after a short period of time.

Calibrated cups

The calibrated cups allow an even faster and easier counting of coins. The RS 2000 allows the user to calibrate up to 8 cups of different weight. Special cups (for specific cash drawers) are also available at ratiotec.

Coin rolls and bundles

The RS 2000 is already programmed with the standard value of EUR and CHF coin rolls and GBP plastic bags. The RS 2000 recognizes them automatically, allowing the user to place different coin rolls or plastic bags. For any other currency, it is also possible to individually program coin rolls and packages (e.g. plastic bags) or banknote bundles.

Calibration

The device can be calibrated (whenever needed) with the weight included. Therefore, there are no extra costs originated from delivery and calibration by the manufacturer. Every individual adjustment is saved after calibration.

Float function

The RS 2000 can be set up for any desired float amount. The indicated value will be automatically deducted from the total, displaying only the actual revenues. The last counting result is saved for the next working day.

RS 2000 Money Scale

The daily manual cashing-up in retail stores requires valuable labour time. The RS 2000 counts coins, banknotes, coin rolls and banknote bundles, and carries out a cashing-up in less than one minute. The RS 2000 assures control over the daily cash revenues and reduces losses. Since it possesses many set-up options and offers the possibility to transfer data to a PC or to an IT system, the RS 2000 is the perfect Money Scale for specialised professionals such as chain stores.

The RS 2000 is fully portable due to its compact format and battery option. Thanks to its inclinable display (with contrast customization), the RS 2000 can be used either standing up or sitting.

The Money Scale guides the user through a complete cashing-up without the need to press any button during the counting process: each subtotal is added automatically into a total sum. The counting process can be done in ascending order (from 1 cent to 500 Euros), or if desired, in descending order.

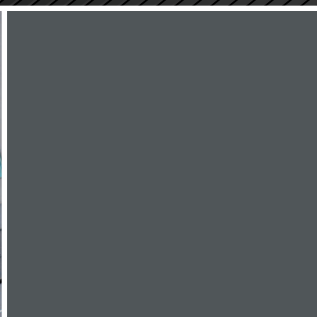

Short facts:

- A device for the complete cash management
- Cashing-up in less than 1 minute
- Set-up according to user requirements
- Easy to calibrate
- Ideal for professionals

ratiotec

We support retail

XL Hod
The standard XL Hod allows counting higher volumes of banknotes. Thanks to its size, the user can place and count up to 400 banknotes trouble-free.

Count banknotes
The RS 2000 counts trustworthy used or damaged banknotes (normally caused by frequent usage).
